

Catalysing climate action, realizing the SDGs: science, interconnections & implementation

To realize sustainable development and a low-carbon and climate resilient future, system-thinking and interconnections between Agenda 2030 and Paris Agreement will be essential. Science and innovation play a key role in the simultaneous implementation of the SDGs and climate commitments. Research agendas need to thoroughly consider interconnections, and implementation - not only at the global level, but also on-the-ground, especially in developing countries. Science-informed implementation will entail a confluence of innovation, technology, and finance (for research and for action).

Side Event
Monday, 6.11.2017
15:00-16:30
Room 7

Imme Scholz
German Development Institute (DIE) / Moderator

Edith Adera (tbc)
International Development Research Centre (IDRC)

Maria Amparo Martinez Arroyo
IAI - Mexico - INECC

Joanes Atela
African Centre for Technology Studies (ACTS)

Leena Shrivastava
The Energy and Resources Institute (TERI)

Asun St. Clair
DNV GL

Martin Visbeck
GEOMAR Helmholtz Centre for Ocean Research Kiel
