A module can only be applied for within the appropriate modularised programme. To determine which modules are available to you, please consult the DFG's programme guidelines relevant to your proposal.

I Objective

For the DFG, promoting gender equality as well as diversity in science and the humanities are key factors that are also enshrined in the DFG statutes.

In order to achieve this, the Standard Allowance for Equity and Diversity module can be used for targeted and project-specific measures to promote gender equality for researchers, diversity in research and the compatibility of research and family.

II Description

The additional project-specific measures funded through this module should help to

- promote gender equality in research,
- promote diversity in science and the humanities or
- make jobs in science and academia more family-friendly (including care).

The Standard Allowance for Equity and Diversity is earmarked for the above-mentioned purposes and may be supplemented with other network or project funds if necessary.

For prerequisites and examples of how the funds may be used, please refer to the appropriate funding guidelines and the DFG website at

www.dfg.de/equity/allowance

III Proposal Instructions

Briefly outline the planned measures. They should be tailored to the needs of the research project or network.

For the various funding programmes, different amounts may be requested as a lump sum within this module. To determine the applicable amount in each case, please refer to the relevant programme guidelines.

More information on equity and diversity in the proposal process, on the review process and on other programme-specific funding opportunities can be found in the funding guidelines, in the individual programme guidelines and on the DFG website at:

www.dfg.de/equity
