I  General Instructions

A proposal for funding a Centre for Advanced Studies in the Humanities and Social Sciences is prepared jointly by several researchers (generally two to three); they are responsible for the scientific conduct of the centre as a whole. One of the applicants assumes the position of spokesperson and represents the centre in dealings with the DFG and other bodies.

The proposal process takes place in two stages. We recommend consulting with the DFG Head Office prior to submitting a proposal.

II  Instructions for Preparing a Draft Proposal

Draft proposals to set up Centres for Advanced Studies in the Humanities and Social Sciences can only be submitted in response to annual calls for proposals and within the deadlines stipulated in the calls. Draft proposals must be submitted in accordance with the structure and items listed and must summarise the centre’s research programme and corresponding objectives as well as any additional measure (section 1 to 3 may not exceed 8 pages in length).

A draft proposal to establish a centre can only be submitted by the spokesperson via the DFG’s elan portal.

elan.dfg.de

Please use the relevant elan template, available in German or English, to prepare your draft proposal in accordance with the format provided (minimum 11 point Arial font, 1.2 line spacing).

www.dfg.de/formulare/53_23_elan

In sections 1 and 2 you may refer to an unlimited number of your own works and those of others that are publicly available. Please list the publications you cite here in the Project- and subject-related list of publications (section 4).
Indicate clearly throughout the draft proposal whenever you are referring to your own work or that of other researchers. The absence of any such indication may constitute a breach of good research practice, and in individual cases may constitute research misconduct according to the Rules of Procedure for Dealing with Scientific Misconduct (VerfOwF). Your own preliminary work, if publicly available, is to be listed with the date of publication. If this preliminary work was based on DFG funding, please refer to the respective stage of a funding period in the text of the proposal.

Draft proposals will be evaluated by a review panel including members of DFG review boards. On the basis of their assessment, the DFG Senate will advise whether applicants should be invited to submit a proposal to establish the centre.

The draft proposal should be structured as follows:

1. **Research programme of the proposed centre**

   State and describe the topic area of the proposed centre and its methodical approach. Explain how the members’ different areas of expertise will facilitate cooperation over an envisaged period of eight years.

   This should relate in particular to the centre’s objective and focus within the working area and anticipated contributions to the current state of research.

   Describe how the principal investigators (i.e. applicants) will be involved and the anticipated benefits of interactions between the local researchers and fellows. Explain why the collaborative working methods are especially suitable for pursuing the centre’s objectives.

   Describe what measures or activities are planned to attain national or international visibility.

2. **Design of the fellows programme**

   A core element of a Centre for Advanced Studies in the Humanities and Social Sciences is its fellows programme. The draft proposal should list (envisaged) fellows and how they will be integrated in the centre. Describe what experience and expertise will be required of the (junior/senior) fellows, how long they will take part in the centre, and how they will
be integrated in the documentation and publication of research outcomes (such as joint publications).

3 Other information

Describe whether any discussions have taken place with the university management regarding support for the centre (particularly with regard to the provision of adjoining office space and infrastructure for the fellows). If arrangements have been agreed upon, please note that no documentation of such must be provided during this proposal stage.

Please indicate whether additional institutions/facilities, stakeholders, and/or non-university partners will be involved.

If other programme elements are planned, such as setting up a professorship within the centre, public relations work, or transfer projects, please describe these aspects and how they will be incorporated within the centre.

Centres for Advanced Studies in the Humanities and Social Sciences are not designed to specifically support researchers in early career phases. However, should you plan to include researchers in early career phases in the centre to a limited extent and with their own independent projects, please explain what plans will be pursued.

Describe what measures are planned for handling research data within the unit. How will this be supported by the institutions participating in the project? Further information on this topic and a corresponding questionnaire are available via:

www.dfg.de/en/research_funding/principles_dfg_funding/research_data

4 Project- and subject-related list of publications

This list should only contain those works that you cited in sections 1 and 2.

The font used for the publication list should not be less than Arial 9 point.

For both new proposals and renewal proposals, you can refer to your own works and those of others; there is no limit to the total number of publications listed. Works which are not in the public domain are not considered publications and cannot be cited. An exception is made for papers that have already been accepted for publication, in which case the manuscript and the editor’s confirmation of acceptance must be enclosed.
A maximum of ten of your own publications that are most relevant to the project can be highlighted in bold or some other way. Even if there are several applicants, the maximum of ten highlighted works may not be exceeded.

Note that reviewers are not required to read any of the works you cite.

Please note the “Guidelines for Preparing Publication Lists” (DFG form 1.91).

www.dfg.de/formulare/1_91

5 Estimated overall costs of the proposed centre

Please provide a cost estimate for the centre as a whole, divided into the first and second funding periods (four years each).

6 Researchers with whom you have collaborated scientifically within the past three years

This information will assist the DFG’s Head Office in avoiding potential conflicts of interest during the review process.
APPENDIX

The proposal must include each applicant’s **academic curriculum vitae**. The template provided (DFG form 53.200) must be used for this purpose.

[www.dfg.de/formulare/53_200_elan](http://www.dfg.de/formulare/53_200_elan)

Each academic curriculum vitae must include the list of the most important publications or published results of the applicant in question. The information can relate to the person’s entire academic career; the publications need not be directly related to the proposed project. The list is to be divided into two parts. Please note the “Guidelines for Preparing Publication Lists” (DFG form 1.91).

[www.dfg.de/formulare/1_91](http://www.dfg.de/formulare/1_91)

Note that the DFG may reject any proposals not in compliance with these rules.
III Instructions for Preparing Proposals to Establish or Renew a Centre

Proposals to establish or renew a centre must be submitted in accordance with the structure and items listed and must describe the nature of the research task, any preliminary work and the type and form of cooperation within the centre. A proposal to set up or renew a centre encompasses both a joint proposal and a coordination proposal. Both can only be submitted by the spokesperson via the DFG’s elan portal.

elan.dfg.de

In the coordination proposal, the spokesperson requests funding for the centre as a whole (such as network funds or funding for gender equality measures). Please use the relevant template, available in elan in German or English.

www.dfg.de/formulare/53_03_elan

In the joint proposal, the group of researchers jointly request the amount of funding they need individually to implement the centre; the overall description of the centre is also included in the joint proposal. The spokesperson submits the joint proposal together with the coordination proposal. Please use the relevant template, available in elan in German or English.

www.dfg.de/formulare/53_04_elan

All parts of a proposal to establish (max. 30 pages) or renew (max. 40 pages) a centre are evaluated by a review panel, which makes a funding recommendation to the relevant DFG decision-making bodies.

In sections 1 and 2 as well as 6 and 7 you may refer to an unlimited number of your own works and those of others that are publicly available. Please list the publications you cite here in the Project- and subject-related list of publications (section 8).

Indicate clearly throughout the proposal whenever you are referring to your own work or that of other researchers. The absence of any such indication may constitute a breach of good research practice, and in individual cases may constitute research misconduct according to the Rules of Procedure for Dealing with Scientific Misconduct (VerfOwF). Your own preliminary work, if publicly available, is to be listed with the date of publication. If this preliminary work was based on DFG funding, please refer to the respective stage of a funding period in the text of the proposal.

Deutsche Forschungsgemeinschaft
Kennedyallee 40 · 53175 Bonn, Germany · Postanschrift: 53170 Bonn, Germany
Tel.: + 49 228 885-1 · Fax: + 49 228 885-2777 · postmaster@dfg.de · www.dfg.de
The following structure applies to the overall project description contained in the joint proposal:

1 **Starting point**

1.1 **State of the art and preliminary work**

Explain briefly and precisely the state of the art in your field in its direct relationship to your project. This description should indicate the joint project's relevance and topicality to your field of research and in what areas the centre intends to make a unique, innovative, promising contribution. This description must be concise and understandable without referring to additional literature.

Describe the (joint) preliminary work and the qualifications of the participating researchers with respect to the project. The information on referencing your work and the work of others contained in section II. 4. must be observed.

1.2 **For a renewal proposal: Report on the progress to date**

For renewal proposals, please report on your previous work and outcomes achieved. This report should also be understandable without referring to additional literature.

2 **Centre objectives and cooperation**

2.1 **Objectives and research plan**

Describe what objectives will be pursued by the centre. Explain what strategy will be used to facilitate cooperation between the applicants and all centre participants, particularly the fellows.

Explain the qualifications of the participating researchers and to what extent the combined expertise is essential in ensuring the centre's success.

What key results do you expect after four years (and after eight years)? What long-term results are anticipated?

2.2 **Organisation of cooperation and design of the fellows programme**

Describe how collaboration among participating researchers (including fellows) will be structured and what working methods are envisaged for the collaboration. If participating researchers will be exempted from teaching obligations, please describe their
importance to the centre. If applicable, please also comment on the significance of the proposed professorship.

Describe the design of the fellows programme, the significance of the fellows to the centre, their integration in the centre, and how they can remain involved with the centre following their stay. Describe what criteria will be used to select the fellows and indicate their qualifications.

The description should demonstrate the added value of the collaborative working methods as opposed to working within (individual) projects.

3 Research and structural environment

To enhance the discursive character of the centre, expertise must be bundled at one site. Describe the proposed centre’s significance to the applicant university. What research focus should be achieved or enhanced?

Describe what support the university management will provide to the centre (particularly with regard to the provision of adjoining office space and infrastructure for the fellows). Please include documentation of any arrangements that have been made.

If you plan to include institutions working in the same field or in neighbouring fields (universities and/or non-university institutions), or if others will participate or cooperate in the centre, please describe this here.

4 Integration of researchers in early career phases and gender equality measures

Centres for Advanced Studies in the Humanities and Social Sciences are not designed to specifically support researchers in early career phases. However, should you plan to include researchers in early career phases in the centre to a limited extent and with their own independent projects, please explain what plans will be pursued.

Describe how diversity and equal opportunities in the research system have been taken into account. Where applicable, describe measures to promote gender equality for those underrepresented in the relevant fields and those to promote work-life balance.
5 National and international visibility

Describe what measures are planned to enhance the national and international visibility of the centre.

6 Handling of research data

Describe what measures are planned for handling research data within the unit. How will this be supported by the institutions participating in the project?

Further information on this topic and a corresponding questionnaire are available via:

www.dfg.de/en/research_funding/principles_dfg_funding/research_data

7 Relevance of sex, gender and/or diversity

Where applicable, please describe whether and to what extent the sex and/or gender

- of researchers,
- of persons under study,
- of individuals affected by the implementation of research results,
- of the animals under study,
- with regard to samples taken from humans or animals,
- in other respects

is relevant to the research project (methods, work programme, objectives, etc.).

Where applicable, please also describe whether and to what extent diversity in terms of, for example, the state of health, ethnic background or culture of

- researchers,
- persons under study,
- of individuals affected by the implementation of research results,
- or diversity in other respects

may be significant to the research project (methods, work programme, objectives, etc.). Please explain to what extend these or similar considerations may also be relevant to animals under study or samples taken from humans or animals.
Additional information is available at

www.dfg.de/en/diversity_dimensions

8 Project- and subject-related list of publications

This list should only contain those works that you cited in sections 1 and 2 as well as 6 and 7.

The font used for the publication list should not be less than Arial 9 point.

For both new proposals and renewal proposals, you can refer to your own works and those of others; there is no limit to the total number of publications listed. Works which are not in the public domain are not considered publications and cannot be cited. An exception is made for papers that have already been accepted for publication, in which case the manuscript and the editor’s confirmation of acceptance must be enclosed.

A maximum of ten of your own publications that are most relevant to the project can be highlighted in bold or some other way. Even if there are several applicants, the maximum of ten highlighted works may not be exceeded.

Note that reviewers are not required to read any of the works you cite. This also applies to review sessions that are held by reviewers on site. Here it is possible to provide manuscripts and publications created prior to the review session in order to be able to explain progress reports at the meeting so that reviewers can view them if necessary. However, reviews are only ever based on the text of the actual proposal.

Please note the “Guidelines for Preparing Publication Lists” (DFG form 1.91).

www.dfg.de/formulare/1_91
9 Supplementary information on the research context

9.1 Ethical and/or legal aspects of the project

9.1.1 General ethical aspects

Taking into account the discipline-specific standards and ethical regulations relevant to your project, indicate whether you anticipate any risks and/or harm to individuals or groups and/or the potential for other negative effects that might be posed by your research. If so, how do you intend to address these issues within the project?

In general, applicants should examine whether their projects require a statement by an ethics committee.

9.1.2 Descriptions of proposed investigations on humans, human materials or identifiable data

Please describe the ethical and legal aspects of your investigation(s):

- criteria for the selection of test persons,
- justification of the number of test persons or sample size,
- description of potential risks and precautions taken,
- explanation provided for test persons and method of informed consent.

Note that in addition to accepting the formal obligations, an ethics committee vote may have to be included as well. The use of human material obtained for diagnostic purposes also requires a statement by the chair of the local ethics committee.
9.1.3 Descriptions of proposed investigations involving experiments on animals

Note that in addition to accepting the formal obligations in part A with regard to compliance with the regulations and provisions of the German Animal Welfare Act and the German Experimental Animals Ordinance, the planned animal experiments must be described. Please explain how the principle of the 3Rs (replacement, reduction and refinement) will be implemented with regard to various aspects of scientific validity. If you have addressed these topics in previous sections, reference them here.

Additional information and guidelines are available in the publication Animal Experimentation in Research: The 3Rs Principle and the Validity of Scientific Research.

9.1.4 Descriptions of projects involving genetic resources (or associated traditional knowledge) from a foreign country

For research conducted abroad involving biological materials (or associated traditional knowledge) or research on biological objects originating from outside Germany, note that such projects may be subject to the regulatory requirements of the Nagoya Protocol under the Convention on Biological Diversity and the access and benefit-sharing (ABS) portions contained therein. Guidance on conducting such projects can be found, for example, in the publication “Proposals for Research and/or Development Projects Involving Access to Genetic Resources and/or Traditional Knowledge Associated with Genetic Resources”, published by the DFG Permanent Senate Commission on Fundamental Issues of Biological Diversity.

www.dfg.de/en/dfg_profile/statutory_bodies/senate/biological_diversity

Please comment on the ABS requirements that affect your project and indicate any steps you have taken or plan to take to fulfil these requirements. Discuss the role of your project’s cooperation partner with regard to the provider country (the country providing access to the material/traditional knowledge). Explain what materials may be transported to Germany. Note that in addition to access and benefit-sharing agreements with the provider country, a declaration of due diligence may also be required in line with the German law “Gesetz zur Umsetzung der Verpflichtungen nach dem Nagoya-Protokoll und zur Durchführung der Verordnung (EU) No 511/2014 sowie zur Änderung des Patentgesetzes”.

9.1.5 Explanations regarding any possible safety-related aspects ("Dual Use Research of Concern"; foreign trade law)

Please check whether there are indications in your planned research project that possible research results could produce knowledge, products or technologies that might be directly misused for significant harmful purposes (Dual Use Research of Concern, DURC).

If there are such indications, please familiarise yourself with the recommendations issued by the DFG and Leopoldina on handling security-relevant research (see DFG and Leopoldina Handbook on Freedom and Responsibility in Research, Recommendations for Handling Security-Relevant Research, last revised 28 May 2014). In your proposal, describe how the risk/benefit ratio is to be assessed and what measures are planned to minimise the risk.

If due to the regulations at your university or research institution, a committee for ethics in security-relevant research (KEF) or a comparable body is to be involved in advance and asked to issue a statement on the project, please include this statement with the proposal. For further information, see the DFG website on handling security-relevant research.

Research must comply with foreign trade regulations (especially the War Weapons Control Act [Kriegswaffenkontrollgesetz], EC Regulation No. 428/2009 [EC Dual Use Regulation], the Foreign Trade and Payments Act [Außenwirtschaftsgesetz], the Foreign Trade and Payments Ordinance [Außenwirtschaftsverordnung] or embargo regulations) relating to the non-proliferation strategy and the handling of potentially critical goods, including technologies, software and sensitive knowledge transfer; applicants are advised to examine their projects accordingly. Information for researchers is available on the website of the German Federal Office for Economic Affairs and Export Control (BAFA)\(^1\).

If you require further clarification, please contact BAFA directly. For research subject to licensing, please note that licences must be obtained from the responsible authority prior to beginning research.

Deutsche Forschungsgemeinschaft
Kennedyallee 40 · 53175 Bonn, Germany · Postanschrift: 53170 Bonn, Germany
Tel.: + 49 228 885-1 · Fax: + 49 228 885-2777 · postmaster@dfg.de · www.dfg.de
9.2 Employment status information

For each applicant, state the last name, first name, and employment status (including duration of contract and funding body, if on a fixed-term contract).

9.3 Researchers with whom you have collaborated scientifically within the past three years

This information will assist the DFG’s Head Office in avoiding potential conflicts of interest during the review process.

9.4 Project-relevant cooperation with commercial enterprises

If you will be conducting your project in cooperation with a commercial enterprise, please note the EU guidelines on state aid\(^2\) or contact your research institution in this regard.

If you are planning to cooperate with an application partner on a transfer project, i.e. a project that tests the results generated by a DFG-funded research project or develops research findings into prototypes or exemplary applications note the supplementary instructions contained in DFG form 54.014.

www.dfg.de/formulare/54_014

9.5 Project-relevant participation in commercial enterprises

Please indicate if you are the owner of a commercial enterprise or a stakeholder in one (e.g. a director). If so, please state how your research project is linked to the company’s production branch or activities.

9.6 Scientific equipment

List larger instruments that will be available to you for the project. These may include large computer facilities if computing capacity will be needed.

If you are applying for instruments that are available at your institution, but are not at the project’s disposal, please explain why this is the case.

\(^2\) Framework for State Aid for Research and Development and Innovation (2014/C 198/01)
9.7 Other submissions

If you have already requested funding for this Research Training Group from other organisations, please mention this here.

9.8 Other information

Please use this section for any additional information you feel is relevant which has not been provided elsewhere. If other programme elements are planned, such as public relations work or transfer projects, please describe these aspects.

10 Requested modules

*Explain each item for each applicant (stating last name, first name).*

A list of the modules that can be applied for can be found in the centre guidelines. Note additional instructions on submitting proposal modules in the relevant module guidelines.

If you will be applying for gender inclusion funding for spokespersons, please describe what measures are planned and explain how these funds were used during the current funding period.

For electronic proposal submissions, please note that euro amounts will automatically be rounded to the nearest hundred, which could result in slight discrepancies in the staffing amounts.
APPENDICES

The proposal must include each applicant’s academic curriculum vitae. The template provided (DFG form 53.200) must be used for this purpose.

www.dfg.de/formulare/53_200_elan

To enable reviewers to assess an applicant’s scientific track record appropriately, applicants may indicate in their CVs any circumstances that might have hampered their scientific work, for example, periods in which they were unable to work continuously due to childcare obligations or due to prolonged serious illness or disability.

Each academic curriculum vitae must include the list of the most important publications or published results of the applicant in question. The information can relate to the person’s entire academic career; the publications need not be directly related to the proposed project. The list is to be divided into two parts:

Please note the “Guidelines for Preparing Publication Lists” (DFG form 1.91).

www.dfg.de/formulare/1_91

Note that the DFG may reject any proposals not in compliance with these rules.
a) Submit a **list of other individuals participating in the centre** who will not be financed through the centre.

b) Include a **list of envisaged fellows**, stating their names, home institution, research area and status (envisaged, contacted, accepted).

c) A **letter by the university** guaranteeing what types of support it will provide to the centre must be included with the proposal. Should replacement costs be requested, the university must also confirm in writing exemption from teaching obligations.

d) For renewal proposals, please include a **complete list of publications or scientific results** brought forth by the centre.

e) In addition, include any **additional documents**, such as ethics statements, research papers, etc.

For **proposals submitted electronically via elan**, you will be asked to upload the required documents. Please make sure that the security settings for the PDF documents allow your documents to be read, copied and printed, and note the maximum size of 10 MB per document.
