Template
for the Final Report for a Transfer Project

Preliminary Remarks

Once a transfer project is completed, a final report must be prepared. For transfer projects that conclude at the same time as the Collaborative Research Centre, a final report must be submitted as part of the renewal proposal or in conjunction with the CRC’s final report. A guide to preparing the report can be found in the proposal template for the renewal of a Collaborative Research Centre:

www.dfg.de/formulare/60_200/

If a transfer project is completed during the course of the funding period or after the Collaborative Research Centre has already been concluded, a final report on the transfer project must be submitted no later than three months after the funding comes to an end. This template is intended to help you prepare the final report.

The sections printed in black provide the structure of the report, while sections in grey provide explanations and placeholders for the information required.

The final report is aimed at reviewers and the decision-making bodies and Head Office of the DFG. Comments, suggestions and assessments arising from the written review of the final report are made available to the Collaborative Research Centre in anonymised form.
The final report should provide information about the implementation and results of the transfer project and details about the course of the project. For example, in addition to reporting on the results and successes, it may also describe any difficulties encountered, barriers to cooperation, deviations from the original project plan, etc.

A final report on a transfer project outside the context of renewal proposals or final reports for Collaborative Research Centres that have already concluded must be submitted electronically, as a pdf file, to the DFG Head Office. It should be written in German or English, in DIN A4 format and with a font size of 10pt.

The DFG expects the results of a transfer project to be published appropriately. All publications must acknowledge that the published results originate from the transfer project and that the work was funded by the DFG.
1.1 General Information about the Transfer Project T<Number>

1.1.1 Title: <Text>

1.1.2 Project leader
<Last name, first name in full, academic degree, date of birth, nationality>
<Full address of university department/institute or non-university research institution>
<Phone number>
<E-mail address>

1.1.3 Application partner
<Full name of company or institution>
<Contact: last name, first name in full, academic degree, position and address>
<Phone number>
<E-mail address>

Please provide a brief description of the application partner. In the case of a company, please state the company owner, industry, main areas of activity, number of employees, annual turnover and foreign business; in the case of a government agency or similar, please specify the department or unit, number of employees, task and budget.>

1.2 Development of the Transfer Project

1.2.1 Report
Please report in particular on:
- Starting situation and objectives
- Methods and use of results from other CRC projects
- Work steps of participating partners
- Evaluation of the results of the transfer project (from both a basic and an applied perspective)
- Comparison with application-specific and economic success criteria (with quantification)
- Impacts on the situation of the participating application partners
- Implications for basic research and teaching
- Any difficulties encountered during the project, barriers to cooperation
- Deviations from the original project plan and reasons for them

What fundamentally new research questions arose from the work in the transfer project?

The information provided in this section should be able to stand on its own, i.e. it should be understandable, coherent and assessable without the need to read additional documents. Only papers whose results and methods are discussed in this section should be cited. Where publications by the project’s participating researchers are cited, reference should be made to the publications and patents arising from the transfer project listed in section 1.2.2 below. Publications by authors who were not involved in the Collaborative Research Centre that are important to the transfer project can be listed at the end of this section (1.2.1). If necessary, this list can also include other documents; if these are unpublished works, they should be appended to the report as electronic files.>

1.2.2 Project-related publications by participating researchers
Here, please only list articles by members of the project team that arose from the transfer project and that acknowledge funding through the Collaborative Research Centre. The names of the authors involved in the project should be appropriately indicated. The articles listed must be publicly accessible. They should be divided into
a) Articles which at the time of proposal submission have been published or officially accepted by publication outlets with scientific quality assurance, and book publications;
b) Other publications;
c) Patents, subdivided into pending and issued.
The number of publications listed in a) and b) combined should not exceed ten. If the list includes articles that have been officially accepted but have not yet been published, submit these and a dated confirmation of acceptance as electronic files to the DFG Head Office.

1.2.3 Documentation of other activities

<Here, you can provide details of other activities carried out as part of the transfer project, for example:
- Presentations, training events, seminars, industry colloquia;
- Staff exchanges, recruitment of staff from the transfer project by the application partner;
- Cross-project working groups;
- Presence and resonance in mass media and on the internet.>

1.3 Project funds

This project has been funded within the Collaborative Research Centre since <month and year>. <If necessary, please also enter:>

Prior to this it was funded between <month and year> and <month and year> in another DFG programme under the reference number XX. <Please also enter:>

It was concluded in <month and year>. <Or:>

It will conclude at the end of the current funding period.

1.3.1 Transfer project staff
