Proposal Preparation Instructions

Draft Proposals and Proposals to Establish or Renew Research Units

Disclaimer: The English translation of this document is provided for informational purposes. In the event of a discrepancy between the English and the German versions, the German text takes precedence.
I General Instructions

Funding proposals\(^1\) are to be submitted jointly by all researchers involved in the Research Unit. They are jointly responsible for the scientific conduct of the project. One of the applicants in the Research Unit assumes the position of spokesperson and represents the Research Unit in dealings with the DFG and other bodies.

The proposal process takes place in two stages:

1. In the first stage the participating researchers submit a draft proposal to the DFG Head Office. This text (10 pages maximum) should outline the Research Unit’s joint work programme and related objectives and other measures in accordance with the structure and items set out below (see section II) and include a summary (2 pages maximum) for each of the proposed individual projects.

   www.dfg.de/formulare/53_20_elan

A draft proposal for a Research Unit can only be submitted by the Research Unit’s spokesperson via the DFG’s elan portal.

elan.dfg.de

Please list all publications cited in the Project Description Project- and subject-related list of publications. Works cited in sections 2 and 3 of the draft proposal are to be listed in section 4. Works cited in the summaries of the individual projects in section 6 are to be listed with the respective individual project. The respective list should only contain those works that you cited.

The font used for the list of publications should not be less than Arial 9 point.

You can refer to your own works and those of others; there is no limit to the total number of publications listed. Works which are not in the public domain are not considered publications and cannot be cited. An exception is made for papers that have already been accepted for publication, in which case the manuscript and the editor’s confirmation of acceptance must be enclosed.

\(^1\) The language in which the funding proposal may be submitted should be agreed upon with the relevant DFG programme division prior to submission.

Deutsche Forschungsgemeinschaft
Kennedyallee 40 · 53175 Bonn, Germany · Postal address: 53170 Bonn, Germany
Tel.: + 49 228 885-1 · Fax: + 49 228 885-2777 · postmaster@dfg.de · www.dfg.de
For both the overall project and each of the individual projects, a maximum of ten of your own publications that are most relevant to the project can be highlighted in bold or some other way. Even if there are several applicants, the maximum of ten highlighted works may not be exceeded. Note that reviewers are not required to read any of the works you cite.

Indicate clearly throughout the draft proposal or proposal whenever you are referring to your own work or that of other researchers. The absence of any such indication may constitute a breach of good research practice, and in individual cases may constitute scientific misconduct according to the Rules of Procedure for Dealing with Scientific Misconduct (VerfOwF). Your own preliminary work, if publicly available, is to be listed with the date of publication. If this preliminary work was based on DFG funding, please refer to the respective stage of a funding period in the text of the proposal.

If, in preparing your draft proposal or proposal, you used artificial intelligence (AI) in the form of generative models for text and image creation, please disclose this fact in a scientifically appropriate manner in your draft proposal or proposal. For more information, see the “Research Integrity” portal.

Furthermore, the draft proposal must include information on the project leaders. For each project leader, submit an academic curriculum vitae with a list of the most important scientific results. The template provided (DFG form 53.200) must be used for this purpose:

www.dfg.de/formulare/53_200_elan

Each academic curriculum vitae must include the list of the most important publications or published results of the applicant in question. The information can relate to the person’s entire academic career; the publications need not be directly related to the proposed project. The list is to be divided into two parts. Please note the “Guidelines for Preparing Publication Lists” (DFG form 1.91):

www.dfg.de/formulare/1_91

Note that the DFG may reject any draft proposals and proposals not in compliance with these rules.

Please include a cost estimate as well.
The draft proposal, which may be submitted at any time, is sent to reviewers. On the basis of their assessments, the DFG Head Office, in consultation with DFG review board members, advises the applicants of whether they should proceed to the second, establishment proposal stage.

You may only resubmit a revised draft proposal once.

2. The establishment or renewal proposal should particularly describe the proposed research work, relevant preliminary work and the type and nature of the cooperation between the applicants, in accordance with the structure and items set out below and in a format suitable for peer review. This proposal to establish or renew a Research Unit can only be submitted by the Research Unit’s spokesperson and only electronically via elan.

elan.dfg.de

The first step is for the spokesperson to submit the framework proposal via the elan portal. This involves entering basic organisational details about the Research Unit and providing the names of the project leaders using an online form. The framework proposal is processed at the DFG Head Office.

Subsequently, the overall description of the Research Unit and the coordination proposal (DFG form 53.02) can be uploaded in which the scientific description of the project is set out. This overall description of the Research Unit and the coordination proposal should not exceed 30 pages in length. The coordination proposal can only be submitted by the spokesperson. However, if the position of spokesperson is planned to be transferred to another person during the total funding duration, this person may be included as co-applicant for the coordination project by way of exception (see section II 5.1).

www.dfg.de/formulare/53_02_elan

Individual project proposals within the Research Unit should be submitted in accordance with the instructions on submitting project proposals and are to be uploaded in elan by the leaders of the projects in relation to the framework of the Research Unit.

A review panel evaluates the proposal to establish or renew a Research Unit and develops a funding recommendation for the appropriate decision-making bodies at the DFG.
II Instructions on Preparing the Overall Description of the Research Unit and the Coordination Proposal

The following structure and items apply to the Research Unit as a whole.

The information on referencing your work and the work of others contained in section I 1 must be observed.

1 State of the art and preliminary work

Please explain briefly and precisely the state of the art in your field in its direct relationship to your project. This description should make clear in which context you situate the work of the researchers participating in the Research Unit and in what areas the Research Unit intends to make a unique, innovative, promising contribution. This description must be concise and understandable without referring to additional literature.

What (joint) preliminary work has been done? In what way are the participating researchers/working groups qualified for the project?

1.1 For a renewal proposal: Report on the progress to date

For renewal proposals, please report on your previous work. This report should also be understandable without referring to additional literature.

2 Objectives and joint work programme

2.1 Objectives of the overall project and expected benefits of collaboration within the unit, incl. a description of the group composition and their project-specific qualifications

What common objectives will be pursued by the Research Unit and to what extent does this require collaboration within the project? Is the collaboration based on an innovative and coherent concept? Can the stated objectives only be achieved through the proposed cooperation? Do you intend to involve all of the relevant disciplines necessary to work on the topic? What key results do you expect in the short to medium term? What long-term results are anticipated? If applicable, why is a working group from another European country or a commercial or industrial company involved, and how is this of particular importance to the Research Unit as a whole?
2.2 Joint work programme including proposed research methods

Describe the Research Unit’s joint work programme.

2.3 Handling of research data

What measures are planned for the handling of research data within the unit? How will this be supported by the institutions participating in the project? Further information on this topic and a corresponding questionnaire are available via:

www.dfg.de/proposal_process/research_data

2.4 Potential impact on the research area and local research environment; distinction from other ongoing programmes directly related to the research topic

Describe the Research Unit’s potential impact on the research area and local research environment. How will the collaboration be structured, especially in cases where Research Units are located at more than one site?

How is the Research Unit distinct from other ongoing programmes directly related to the research topic (e.g. Collaborative Research Centres, Priority Programmes, programmes provided by other funding organisations)?

2.5 Measures to advance research careers

Detail what measures are planned to integrate and promote promising researchers in early career phases within the Research Unit (e.g. training programmes, special measures, etc.). Does the department offer doctoral programmes?

What measures are planned to support gender equality and to help researchers combine career and family?

2.6 National and international cooperation and networking

What national and/or international collaborations are relevant? For Research Units located at multiple sites, how will communication be handled and ensured?

2.7 Collaboration with international cooperation partners

Are international cooperation partners involved in the Research Unit?
2.8 Description of the spokesperson’s qualifications

Please explain why you would like to assume the role of spokesperson, also with respect to your academic qualifications and personal skills. What experience do you have in managing third-party funded projects?

3 Project- and subject-related list of publications

This list should only contain those works that you cited in sections II 1 and II 2. Please note the “Guidelines for Preparing Publication Lists” (DFG form 1.91):

www.dfg.de/formulare/1_91

4 Coordination

4.1 Description of how joint objectives and the joint work programme will be implemented in the coordination project

Describe the coordination project’s joint work programme and how the joint objectives will be achieved and implemented.

4.2 Requested modules

The template provided in elan contains a list of funding modules available to facilitate coordination within the Research Unit. Please provide detailed justification for each module requested in the online form.

If you will be applying for gender inclusion funding for spokespersons, please describe what measures are planned and explain how these funds were used during the current funding period.
5 Project requirements

5.1 Employment status information

For the spokesperson and the co-applicant, if applicable, state the last name, first name, and employment status (including duration of contract and funding body, if on a fixed-term contract).

If the position of spokesperson is planned to be transferred to another person during the total funding duration, this person may be included as co-applicant for the coordination project by way of exception. It is not possible for this person to apply for funds on their own within the coordination project or for the spokesperson to request funds within the coordination project for this person to fulfil coordination tasks. If applicable, please provide a short justification of the planned transfer here. As the co-applicant cannot be assigned in elan, this will be done by the DFG Head Office after proposal submission.

5.2 Composition of the project group

List only those individuals who will work on the coordination project but will not be paid out of the project funds. State each person’s name, academic title, employment status, and type of funding.

Please list separately the individuals paid by your institution and those paid using other third-party funding (including fellowships).

Please give appropriate consideration to diversity when composing the members of the project group (regardless of the individual funding sources).
For additional information, see:

www.dfg.de/diversity/en

5.3 Researchers with whom you have agreed to cooperate on this project

Where applicable, list researchers with whom you have agreed to cooperate on this project. Any such agreements must be attached to the proposal. Please do not list here any collaborations from other projects of the unit.
5.4 Scientific equipment

*List larger instruments that will be available to you for the coordination project. These may include large computer facilities if computing capacity will be needed.*

If you are applying for instruments that are available at your institution, but are not at the project's disposal,
please explain why this is the case.

5.5 Project-relevant cooperation with commercial enterprises

If you will be conducting your coordination project in cooperation with a commercial enterprise, please note the EU guidelines on state aid or contact your research institution in this regard.

5.6 Project-relevant participation in commercial enterprises

Please indicate if you are the owner of a commercial enterprise or a stakeholder in one (e.g. a director). If so, state how your coordination project is linked to the company's production branch or activities.

5.7 Researchers with whom you have collaborated scientifically within the past three years

This information will assist the DFG's Head Office in avoiding potential conflicts of interest during the review process.

5.8 Considerations on aspects of ecological sustainability in the planning and implementation of the project

In research as well, there is an urgent need for a further shift towards sustainable practices. Use this space to reflect on how sustainability considerations are taken into account in the network measures proposed and, if applicable, in the research processes within this coordination project. Here, you are expected to provide a brief statement that refers specifically to the network-specific plans. Research quality is the pivotal factor for the funding decision, however, so this is the priority in terms of planning the research; for this reason, resource-saving and emission-reducing measures should not result in restrictions in the desired knowledge gain. If increased funding is required due to more
sustainable research approaches, this can be taken into account when applying for funds. For further information, see the cross-disciplinary catalogue of guiding questions: www.dfg.de/reflection_sustainability

6 Other information

Please use this section for any additional information you feel is relevant which has not been provided elsewhere.
APPENDIX

The proposal must include each applicant's **academic curriculum vitae**. The template provided (DFG form 53.200) must be used for this purpose:

[www.dfg.de/formulare/53_200_elan](http://www.dfg.de/formulare/53_200_elan)

Please follow the guidelines for the draft phase accordingly, cf. section I 1 above.
