Within the DFG-funded project “Activation of C-H and C-F bonds at Rhodium complexes for the functionalisation of fluorinated olefins and ethers“– the Department of Chemistry at the Humboldt-Universität zu Berlin welcomes applications for a

3-year PhD Position (E13 TVöD, 65 %)

starting as soon as possible.

The project will focus on research in the fields of fluorine and organometallic chemistry, as well as homogeneous catalysis. The successful candidate should have a strong interest in at least one of these areas, hold a degree in chemistry and be familiar with common experimental techniques to work under inert conditions, preferably also with gaseous compounds.

Candidates being at least partially trained and experienced in the area of Inorganic Chemistry are invited to apply. Please submit your application with the code number “DR/093/21” to Humboldt-Universität zu Berlin, Institut für Chemie, Prof. Braun, Brook-Taylor-Str. 2, 12489 Berlin. To accelerate the process, please submit your application in electronic form to Mrs Guiyong Jeong (guiyong.jeong@chemie.hu-berlin.de).

HU seeks to increase the proportion of women in research and teaching, and specifically encourages qualified female researchers to apply. Preference will be given to disabled persons with equal qualifications. People with an immigration background are specifically encouraged to apply.

Please visit our website www.hu-berlin.de/stellenangebote, which gives you access to the legally binding German version.

Application deadline: 30.07.2021
